52.0.5
F83
v.45

Instruments in the Adler Astronomical Museum—(Continued)—
Calendar, ephemeris, sun-dial, nocturnal, quadrant, A 538
sun-dial 538
Circumferenter, A 544
and compass 545
Clock, A round table 535
tellurium 327
Globe 536
Coelostat on the upper terrace 618
Compass, A 540
Dials 345, 346, 347, 348, 349, 350, 351
Geodetic instruments 615
and telescopes 542
Globe, A celestial 328
An Arabic 328
Two silver 329
Graphometer, A 543
Herschel's 6-inch telescope 615
Hour-glasses, clocks, and dials 533
Level, A 547
Magnet, A natural 541
Mathematical instruments 548
Nocturnal, The principle of the (drawing) 338
Nocturnals, A group of seven 339
North hall showing model observatory 331
Observing and drawing instruments 549
Octant, An 341
Octants, Early, and reflecting sextant 342
Planetarium, A mechanical 325, 326
Quadrant, A telescopic 548
Quadrants, Six, of various forms 340
Reflector probably made for Louis XV 616
Refractor, Modern 615
Sun-dials of various forms 344
Telescopes, A group of old 615
Torquetum, A 546
International Astronomical Union, Cambridge, Massachusetts, September 2-9, 1932, Plates VIII and IX ..... Op. 453
Jupiter, Early perturbations of 78
Recent perturbations of 75
Jupiter's satellite I totally eclipsed by III, December 2, 1931 22
King, Edward Skinner (1861-1931), Plate II ..... Op. 65
Leonid radiant, November 17, 1931 53
Light-curves of ϵ^1 and ϵ^2 Lyrae 90, 91
Lowell observatory, Staff of the 251
Lunar features and solar activities explained 203
rays explained by laboratory device 265, 266, 267
Mayall, Dr. N. U., and Mr. Joseph O. Hickox 606
Mensing, Mr. Ant. W. M., of Amsterdam 322
Meteor crater from the south rim 248

Meteoric shower device 192
Moon, East central view of the 210
The, on October 19, 1931 59
Nebula in Cygnus, Part of the network, Plate VI ..... Op. 200
Neptune perturbed by planet *O*, Accepted orbit of 74, 521
Revised orbit of 522
Observatory, J. Milo Webster's 112, 113
Orionid radiants, October 19, 22, 1931 ..... 226, 227
Orrery, The Philosopher reading a lecture on the, Plate VII ..... Op. 321
Parallax in declination (diagram) 274
right ascension (diagram) 273
Pease, Dr. Francis 596
Pendulum, A short Foucault's (diagrams) 257, 259, 260, 262, 263
with accessories, A Foucault's 258
Planet *P*, Predicted orbit of 352
U, Orbit of 81
Planets, Apparent paths of the, among the stars in 1932 ..... 28, 29, 30
Planetarium and Astronomical Museum, Adler—
Plate III ..... Op. 125
Annual and precessional drives 147, 148
Control board of the demonstrator's desk 150
Cross-section of building 129
star projector 133
Dedication plaque 126
Diagram of planetarium instrument 132
to show need for allowance for parallactic displacement 135
Driving disk (schematic) 140
Lunar projector diagrams 142, 143, 144
Moon, sun, and Saturn projectors 141
Motor drive in schematic form 146
Optical pointer 151
Plan of building 127
Planetary cage, Southern section of the 137
projector diagrams 138, 139
Solar projector, Front and back views of the 136
Specimens of signs of zodiac 128
Star projector assembled 134
Planetarium instrument in the Chicago installation, The, Plate IV ..... Op. 132
Saturn, The perturbations of 70, 72
Solar eclipse of August 31, 1932, Drawing of 485
eruptive prominences (drawings) 204
Star field near the sun at eclipse of 1934 February 13-14 623
Star fields (diagram) 195
Telescope, The 100-inch, from top of 150-foot tower 601
with which Pluto was discovered, The 13-inch Lawrence Lowell.. 253
Telescopes as seen from the Inn, The tower 598
Tomb of Percival Lowell, The 250
Uranus perturbed by Neptune, Leverrier's orbit of 520
Pickering's orbit of 520
Zodiacal Light, The 312

GENERAL INDEX

A.A.A.S., 21 June 1932, Syracuse meeting of section D (astronomy), *Philip Fox* 405
Adler planetarium and astronomical museum of Chicago, The, *Philip Fox*.... .....125, 321, 532, 613
Amateur astronomers meeting 443
national convention, *Leo J. Scanlon* 586
astronomical society, The skyscrapers 518
astronomy in the northwest 241
telescope makers of Chicago 181, 310, 437, 586, 652
Amateurs, Notes concerning Pittsburgh, *Leo J. Scanlon* 436
from 57, 111, 178, 310, 436, 584
visit Perkins observatory, *Leo J. Scanlon* 584
American Astronomical Society—
and International Astronomical Union meetings 444
The forty-seventh meeting of the, *Dean B. McLaughlin* 185
forty-eighth meeting of the, *Raymond S. Dugan* 459
forty-ninth meeting of the 654
Andrews, L. B., and *F. L. Whipple*, The Harvard eclipse expedition of 1932.. 530
Apparatus for planetarium demonstration, Auxiliary, *Philip Fox* 188
Asteroid discovered at La Plata, New, *Juan Hartmann* 590
Asteroids 1932 EA, and 1932 HA, *G. Van Biesbroeck* 527
Astronomer lost by drowning, Research 448
Astronomical club of Watertown, Wisconsin, The Godfrey 590
fraternity of the world, The, Part X, *David B. Pickering*..... 245
Part XI, *David B. Pickering*..... 595
society, East Bay, *Geo. D. Baird* 314
of students, An, *Grace Lefever* 318
The Chicago 589
tours 442
Astronomy as a panacea 120
in a junior college, *Frank B. Lindsay* 215
The enigma of, *Frank Earus* 178
Astrophotographic building of the Harvard Observatory, Dedication of the, *Leon Campbell* 277
Aurora of May 29, 1932, The.....377, 590
John Wesley Simpson 445
May 30, 1932, *J. J. Nassau* 446
Baird, Geo. D., East Bay astronomical society 314
Barry, Thomas D., Collineation diagrams for the parallax of the moon..... 271
Book Reviews—
Astronomische Beobachtungsmethoden, by D. J. Stobbe 122
Bulletin of the Harvard College Observatory, No. 886 314
